

How to Make Your Own Christmas Heart

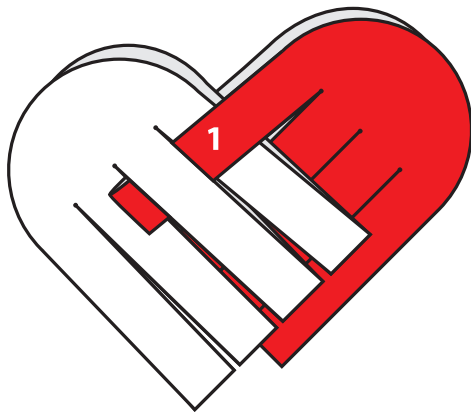

- 1** Fold each paper in half and outline a square and a half semicircle on them. Cut the shape out of the double layer of paper, with the semicircle opposite to the fold.

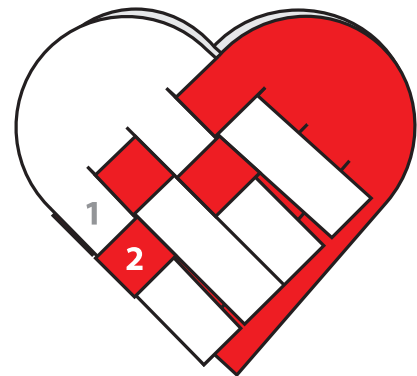

- 2** Now you are ready to weave.

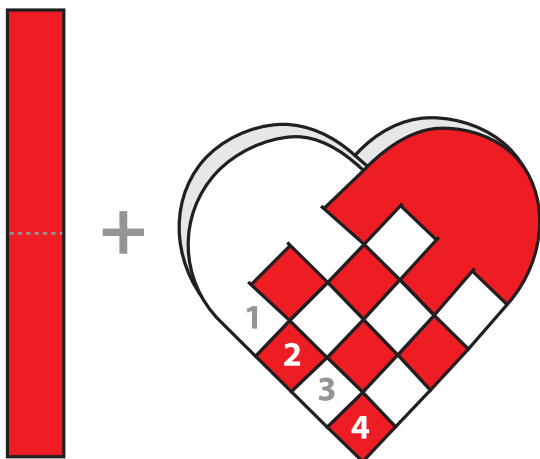

- 3** Weave the strips alternating outside and inside each other as shown in the illustrations, one strip at a time.

- 4** Continue weaving until you have a basket.

- 5** Make a handle: fold a strip of paper and glue to the insides of the pocket.

- 6** Now you can hang your Christmas hart on your tree and put some candy in if you like.
